Education

Veermata Jijabai Technological Institute, Mumbai **Aug. 2024 – Present**
B.Tech in Computer Engineering (Minors in Cybersecurity) | CGPA: **9.41**

Alpha Jr. College of Science and Commerce **Aug. 2022 – May. 2024**
MHT-CET: **99.98%ile** | Rank: **38** | JEE Mains: **98.87%ile** | 12th HSC: **93.83%** | 10th ICSE: 97.6%

Relevant Coursework

- Data Structures and Algorithms
- Operating Systems
- Machine Learning
- Computer Architecture
- DBMS
- Artificial Intelligence

Projects

SmartCV - AI-Powered Resume Builder | *React, Node.js, Express, MongoDB, JWT* **Dec. 2025 - Feb. 2026**

- Collaborated in an agile team environment and engineered a full-stack **MERN application** with **RESTful APIs**, secure **JWT authentication** and real-time preview, achieving 99.9% uptime for critical user-facing functionalities.
- Implemented **NLP based top 30 keyword extraction**, **5 domain skill classification** and keyword detection. Achieved 99% optimization for feature extraction and accuracy.
- Architected a **6-factor ATS scoring engine** using **TF-IDF** and **cosine similarity**, improving resume compatibility for jobs and generating actionable feedback.
- Integrated modular microservice-like components for authentication, scoring, and recommendation, enabling streamlined, scalable feature expansion and iterative product improvements.

Cardexa | *React Native, Expo, SQLite, Zustand, Tailwind CSS* **Apr. 2026 - May. 2026**

- Designed and developed a **local-first, privacy focused personal finance application** using **React Native**, and **Expo**, and achieved 99% feature reliability across platforms.
- Delivered a full stack solution with secure data handling and optimized local storage, ensuring enhanced data privacy.
- Built an automated expense tracking system using **RegExp-based automatic SMS parsing engine**, detected recurring payments, and crafted real time spending analytics and categorization with 99% accuracy.
- Created a RAG based card optimizer to recommend best payment methods based on spending patterns and rewards.
- Enhanced user experience through intuitive UI/UX design, ensuring seamless navigation and high user retention.

UrbanLink | *React.js, Node.js, Express.js, JWT, Python, Generative AI* **Mar. 2026 - Jun. 2026**

- Led the construction of a **full-stack, governance web platform** enabling real-time reporting of municipal issues with integrated dashboards and analytics at 3 levels for data-driven decision making.
- Devised an **AI-powered issue classification system** using **Google Gemini 1.5 Flash Vision API** and 24 Mumbai ward-level models, improved categorization accuracy and boosted routing efficiency.
- Constructed a **3-tier role-based access control (RBAC) system** with granular permissions (Citizen, Ward Manager and Mayor) at the **React Router** level, **Node.js/Express backend** with **JWT authentication**, and **Supabase storage** with **Multer based middleware pipeline**.
- Streamlined backend performance to achieve 1s API response time, enhancing real-time user experience.
- Ensured robust system reliability for 3 user roles through error handling, and edge-case testing across the full stack.

Technical Skills

Languages: C, C++, Python, SQL, JavaScript, HTML5, CSS3
Frameworks & Libraries: React.js, React Native, Node.js, Express.js, Zustand, Numpy, Pandas, TensorFlow, Scikit-learn
Databases: MongoDB, MySQL, Supabase (PostgreSQL)
Developer Tools: Git, GitHub, Ollama, Linux, VS Code, Vercel, REST API Testing
Core Concepts: Data Structures & Algorithms, OOP, Machine Learning, AI, Competitive Programming, Version Control

Achievements and Certifications

- Solved **500+ problems on Leetcode** related to Data Structures and Algorithms and strengthened problem-solving skills including advanced concepts in **Dynamic Programming**, **Graphs** and **Greedy Algorithms**.
- Recognized as a **Supercontribtor (Hacktoberfest 2025)** - submitted high-quality pull requests and resolved technical issues across Open-Source public repositories.
- Won **2nd Runner-up prize at Neofuture 2026 Hackathon** for building a local-first, privacy-first personal finance application with a clean, intuitive, user-centric UI, enhanced data privacy, automated SMS-based expense tracking, subscription detection and intelligent spending recommendations.
- Maintained a CGPA of **9.41/10** in VJTI upto Semester-4
- **State level Bronze medal** - Dr. Homi Bhabha Science Competition (2017-2018)
- **Certification**: **Machine Learning Specialization** – **Coursera**
